The upright Juniper is one of the very hardiest Evergreens, and one of the most satisfactory for New England climate. It keeps its color all winter, it fruits well when still small, and it is absolutely hardy. All our plants have been recently transplanted.

The Swiss Stone Pine is one of the most beautiful of all Pines for formal work. The tree is very slow-growing, consequently is important for use as accents where one wishes an accent which will stay in scale for many years. We have some beautiful specimens.

Berberis verruculosus  Evergreen Barberry
* 4" pots  2.00 E

Calluna vulgaris  Scotch Heather. in named varieties

Scotch Heather the "Bonnie Purple Heather" of song and verse is a very lovely low-growing evergreen shrub, 6" to 3' high, of the Heath Family, covered in mid-summer with small bell-shaped purple flowers, borne on slender spikes. These flowers stay in good condition for some weeks, and if cut while fresh will hold their color and charm all winter. Honey bees, too, are attracted to Scotch Heather and make from it a honey that is considered very choice. This plant is widely known as invaluable for planting in full sun in sandy soil; it is also most attractive as an edging to beds of Rhododendrons, Laurel etc., and in Rock-gardens. This little plant gives most satisfaction when transplanted from pots. Besides the common Purple Heather there are many varieties which give variation in the height of plant, the color of flower, and the season of bloom. Below we give a list of these varieties,

var. alba  White Scotch Heather. early blooming, light green foliage, white flowers. 3" pots 12-15" all pot-grown, which we offer as follows:

2 1/2" pots  .40 E  3.50 X  32.50 C
3" pots  .60 E  5.00 X  45.00 C

var. alba elata  Tall White Heather. Late blooming, very tall, straight growth. Foliage soft dark green. White f1s. 18-24"
Calluna vulgaris (cont.)

var. alba hammondii Hammond's White Heather. Mid-season, Tall upright, growth, foliage deep rich green, flowers white. 18-24" high. 2 1/2" pot

var. alba minor. Small leaved white Heather. Mid-season. Tall, bushy growth, foliage very fine, light green. Flowers white. 15-20" high. 3" pots

var. alba pilosa. Late blooming. Tall growth, foliage soft grayish green. 18-20" high. 3" pots

var. alba rigida. Late. Low rigid growth, of rich deep green

var. var. alportii. Late blooming Tall, straight growth, foliage deep rich green, turning purple in autumn. Flowers rosy carmine. 24" high. 2 1/2"

var. argentea. Silver leaved Heather. mid-season. Rather dwarf growth, foliage green variegated white, flowers purple. 10-12" high. 3" pots.

var. compacta. Late blooming. Low compact, moss-like growth of bright rich green. Purple flowers 4-6" high. 3" pots.

var. cuprea. Mid-season. Straight medium growth, foliage bright, almost yellowish green, turning to rich glowing red in autumn. Flowers purple. 12-15" high 2 1/2 and 3" pots

var. hypnoides. Late blooming. Low spreading growth, foliage soft deep green flowers deep pink. 6-12" high 3" pots

var. rubra Early blooming Low spreading growth, foliage soft green turning purple in autumn. Flowers rosy carmine. 6-12" 2 1/2" and 3" pots.

var. tomentosa. Mid-season. Low compact growth, foliage soft gray, flowers purple. 4-6" high. 2 1/2" and 3" pots

This is one of the rarest and most beautiful of all Hawthorne. It has large white flowers in early spring. Even the young trees offered by us bear quantities of large round edible scarlet fruits in August and September, and later the substantial leaves turn a beautiful scarlet. A beautiful, small, flowering tree, suitable as a
specimen, for planting in groups on the edges of woods - or near the sea.
